

WHAT IS CLAIMED IS:

1. A battery comprising a battery body and a single input-output terminal fixed thereto, wherein said input-output terminal includes a positive terminal and a negative terminal which are electrically insulated from each other.

2. A battery according to claim 1, wherein said input-output terminal is provided convexly from said battery body.

3. A battery according to claim 1, wherein said input-output terminal is a single-head plug.

4. A battery according to claim 1, wherein said input-output terminal is a single-head jack.

5. A battery according to claim 1, wherein said input-output terminal is a single jack provided concavely in said battery body.

6. A battery according to claim 1, wherein said input-output terminal includes a first-polarity terminal formed concavely in a tip of said input-output terminal and a second-polarity terminal arranged on an outside of said input-output terminal.

7. A battery according to claim 1, wherein said input-output terminal includes a threaded first-polarity terminal formed in a tip of said input-output terminal and

a threaded second-polarity terminal on a base portion of said input-output terminal.

8. A battery according to claim 2, wherein said input-output terminal includes a threaded first-polarity terminal formed in a tip of said input-output terminal and a threaded second-polarity terminal on a base portion of said input-output terminal, and has a through-hole communicating into an interior of said battery body.

9. A battery according to claim 1, wherein said battery is a cylindrical secondary battery or a rectangular secondary battery.
